03 Course structure

04 Learning outcomes

05 Grading criteria & expectations

06 AI & GIS
Opportunities-Challenges

07 GitHub

08 QGIS installation

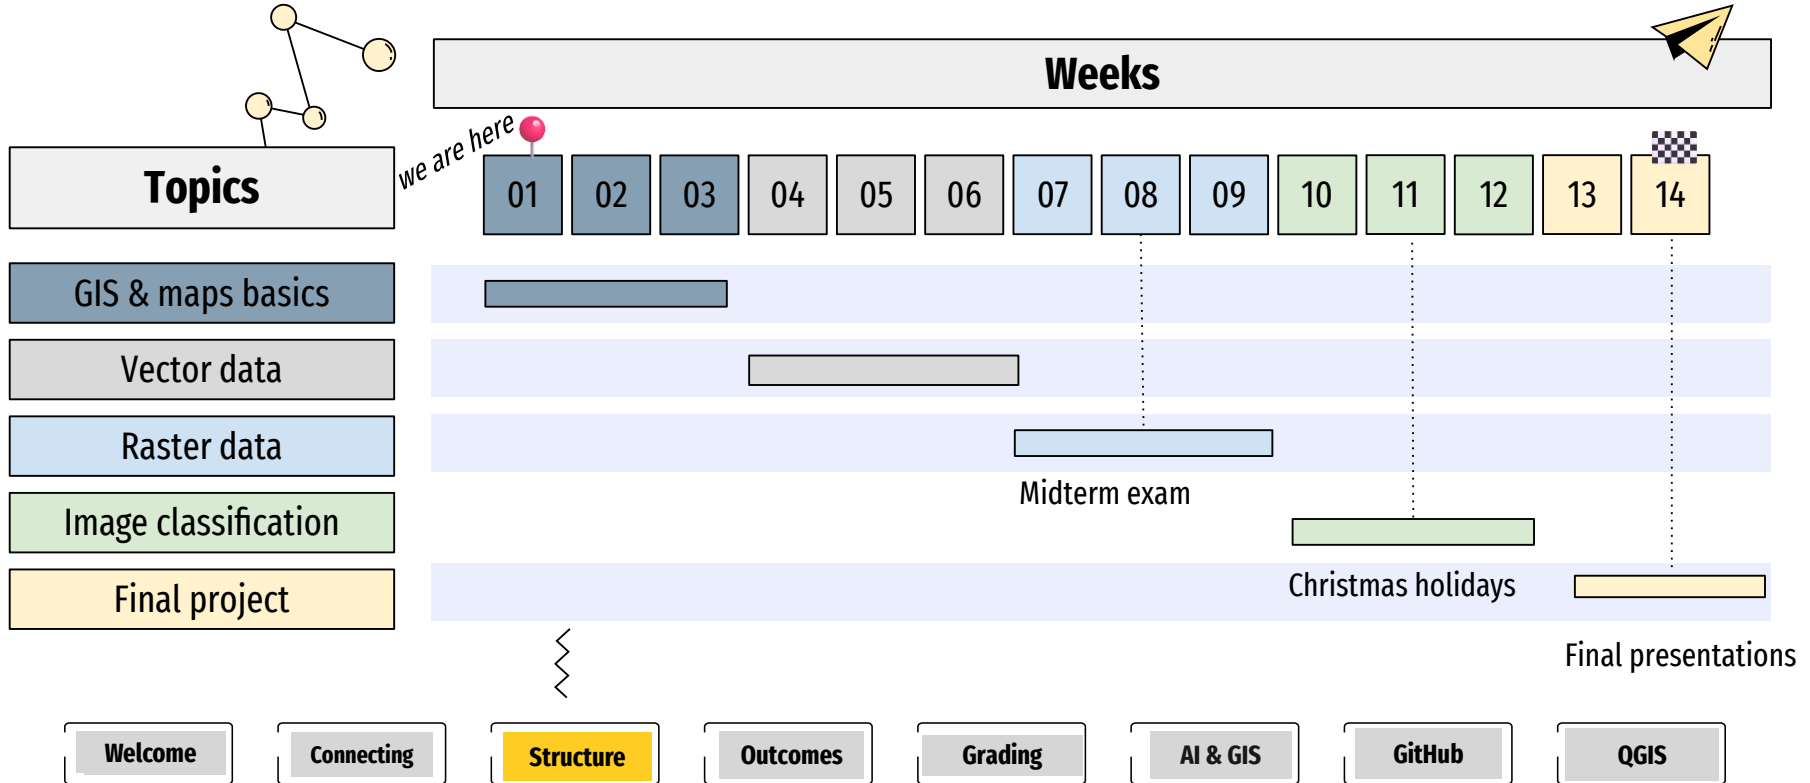

Get to know each other

Scan me and let's discuss!

Course structure & timeline

Learning outcomes

- Use QGIS software to manage, visualize and analyze spatial data
- Apply georeferencing techniques, work with vector and raster data and conduct basic image classification
- Create maps and spatial analysis outputs
- Collaborate in groups to design and execute GIS projects

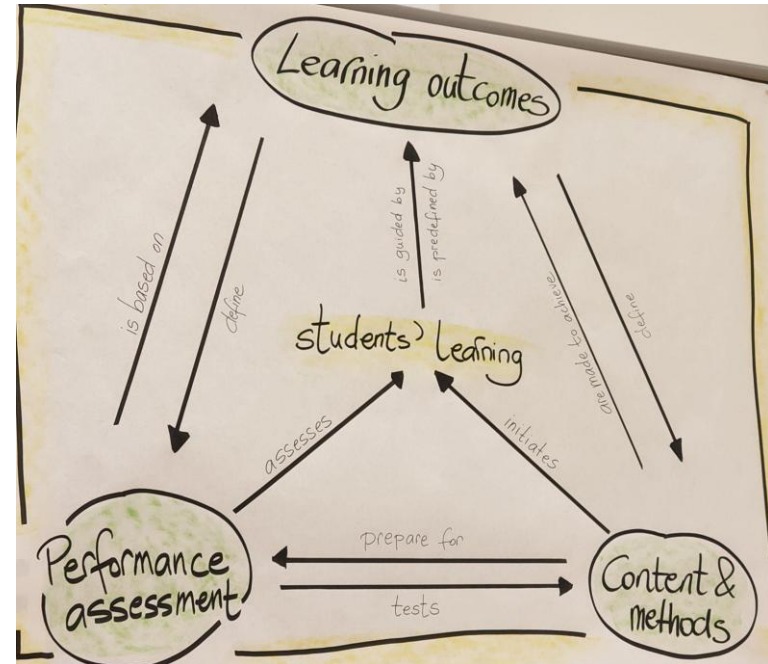

chart by MMag. Dr. Elisabeth Weber

Grading criteria

Grading Scheme

Final group project 45 %

Weekly lab assignments 45 %

Participation 5 %

Midterm exam 5 %

Expectations

- Bring your own laptop
- Download the data before the weekly lab
- Weekly attendance
- Submission of assignments on time (sent by email)

Email subject format: “402.467_LabX_LastName_FirstName”

- Equal contribution in group projects
- Active participation

Why GIS matters

GIS is being used to answer questions such as:

- Where is it? 
- What else is nearby?
- Where is the highest concentration of 'X'?
- Where can I find things with characteristic 'Y'?
- Where is the closest 'Z' to my location?

Tobler's first law of Geography

"Everything is related to everything else, but near things are more related than distant things"

Discussions section. Remember we talked about active participation? **This is also the space to do so!**

GitHub

Note

Highlights information that users should take into account, even when skimming.

Tip

Optional information to help a user be more successful.

Important

Crucial information necessary for users to succeed.

Warning

Critical content demanding immediate user attention due to potential risks.

Caution

Negative potential consequences of an action.

1 Download the software

- You can download the latest version here: <https://www.qgis.org/download/>

Recommendation: download the latest Long Term Release version as it is more stable

2 Depending on your operating system, choose between *Download for Windows*, *Download for macOS* or *Download for Linux*

If you are stuck, feel free to check:

- QGIS official Installation guide: <https://qgis.org/resources/installation-guide/>
- YouTube tutorials on *How to install QGIS*: <https://www.youtube.com/watch?v=88rUyahYrDk>

Note! Set the interface language to **English**

QGIS interface

Check official QGIS documentation: [2.1. Lesson: An Overview of the Interface](#)
